LUNAR INVESTMENTS

Current Portfolio Snapshot

As of 30 June 2026 · Internal — for Investment Committee use

HOLDINGS BY SECTOR AND STRATEGY

All weights are percent of total firm AUM (~SAR 2.0 billion), at cost. The **Technology & Consumer** rows are the sector bucket monitored against the Charter's 10% sector concentration cap.

Holding	Sector	Strategy	% of AUM
TechCo Arabia (private)	**Technology**	Private growth equity	3.5%
Basalt Retail Holdings (private)	**Consumer**	Private growth equity	2.5%
stc Group	**Technology**	Public equities (Tadawul)	1.5%
Jarir Marketing Co.	**Consumer**	Public equities (Tadawul)	1.0%
Technology & Consumer sector bucket — subtotal			**8.5%**
Al Rajhi Bank	Financials	Public equities (Tadawul)	28.0%
SABIC / petrochemicals basket	Materials	Public equities (Tadawul)	18.0%
Saudi Aramco	Energy	Public equities (Tadawul)	14.0%
Healthcare basket	Healthcare	Public equities (Tadawul)	8.0%
Real estate basket	Real Estate	Public equities (Tadawul)	6.0%
Saudi Electricity Co.	Utilities	Public equities (Tadawul)	5.0%
REITs & diversified income	Other	Public equities (Tadawul)	7.5%
Sukuk & cash	Liquidity reserve	Fixed income / cash	5.0%
Total firm AUM			**100.0%**

Technology & Consumer bucket at 8.5% of AUM sits inside the Charter's 10% sector concentration cap, with 1.5 percentage points of remaining headroom before the cap binds.

HOLDINGS BY STRATEGY — PUBLIC VS. PRIVATE SPLIT

Strategy	% of AUM
Public equities (Tadawul-listed)	94.0%
Private growth equity	6.0%
Total	**100.0%**

The private growth-equity program is in an early deployment phase relative to its target allocation; TechCo Arabia and Basalt Retail Holdings are its only closed positions to date, both within the Series A–C stage window and the SAR 20–60M ticket band defined in the Charter. The current live pipeline (Darb, Thara Pay, Aqar Development) is under active screening and analysis and is not yet reflected in this snapshot.

CONCENTRATION HEADROOM — PRIVATE PIPELINE IMPLICATION

Because the Technology & Consumer sector bucket already stands at 8.5% of AUM, any new private ticket in this sector adds directly to a bucket with limited remaining headroom under the 10% cap. A SAR 40M ticket (2.0% of AUM at the firm's current ~SAR 2.0bn base) would bring the bucket to 10.5% of AUM — above the cap — and must be flagged as a concentration warning at screening rather than a clean pass, per the Charter's post-deal calculation methodology.

FUND CAPACITY

Remaining dry powder for the private growth-equity program is sized against the Charter's SAR 20–60M ticket band and the firm's overall liquidity reserve; individual ticket sizing decisions are made deal-by-deal at the screening stage.
