STRATEGY BANDS AND MANDATE HEADROOM

Sector bands are the Public Book Strategy Bands approved by the Investment Committee on 12 July 2026 as an annex to the IC Charter. Weights at market value.

Sector	Market value (SAR M)	Weight	Band	Status	Headroom (SAR M)
Financials	588.00	31.9%	22-30%	Above band	Trim at least 35.1
Materials	374.65	20.3%	15-22%	In band	Add up to 30.8
Energy	278.88	15.1%	10-18%	In band	Add up to 52.8
Healthcare	163.20	8.9%	6-12%	In band	Add up to 58.0
Real Estate & REITs	277.25	15.0%	12-18%	In band	Add up to 54.5
Utilities	107.50	5.8%	4-8%	In band	Add up to 39.9
Technology & Consumer	53.44	2.9%	0-6%	In band	Add up to 30.0 (see note)

- **Single-name cap:** no issuer may exceed 30% of the public book. Al Rajhi Bank stands at 31.9%, above both the cap and the Financials band top; a trim of at least SAR 35.1M restores both (to 30.0%).
- **Technology & Consumer note:** the sleeve's in-book headroom is SAR 57.1M, but the IC Charter caps firm-wide Technology & Consumer exposure (public and private books combined) at 10% of AUM; the firm-wide bucket stands at 8.5% of AUM, so the binding headroom is 1.5% of AUM, SAR 30.0M.
- **Geography:** the book is 100.0% Saudi Arabia. The IC Charter mandates Tadawul-listed instruments only for the public book, so there is no non-KSA capacity under the current mandate; MENA ex-KSA exposure would require a Charter amendment.
- **Methodology:** trim and add amounts are computed holding total book value constant (trims redeployed within the book, additions funded from the liquidity sleeve).
